

INLAND EMPIRE VETERINARY IMAGING, P. S.

Diagnostic Imaging Excellence for Your Pet

Jeff Siems, MS, DVM, DACVR

Keystone Instructions

Please review the Keystone Community User Guide before proceeding with the below instructions. This can be found on our website under the link for Keystone Instructions.

The following is the Asteris Keystone Community install link that you will allow you to send Inland Empire Veterinary Imaging images for consultation:

<http://www.asteris.biz/Keystone/Community/Keystone.Community.Loader.application?ConsultantID=c3d7e127-d5af-4305-be51-9ad0a0474b33>

This link is specific to IEVI and will only send the images that you choose to send for consultation.

Please either click on the link above or copy and paste the entire link into your web browser. The link works better with Internet Explorer, but will also work with Chrome or Fire Fox while running an add on/extension.

When you activate the link, by clicking or pasting into your browser, download will begin immediately. You will be prompted to create an account for your clinic. Continue to follow the prompts to complete installation.

Should you need any assistance during the install process, please feel free to contact Asteris via phone: 1 (877) 727-8374 ext. 402 or email: support@asteris.com

Please let us know if you any other questions.

Regards,

IEVI
